

der zweite höchste Berg, can **only** have the reading in (2a). For (4), German requires compounding (see 6), corroborating the close relation between the ordinal and the superlative in this reading.

(6) *der zweithöchste Berg*

In conclusion, any cartographic attempt at defining the predetermined locations for prenominal modifiers needs to take into account the following facts: (i) Superlatives and ordinals can occur in either order in Dutch; (ii) ordinals can be situated inside the extended projection of a superlative; (iii) neither a focus-analysis nor differences in restrictiveness can account for the cooccurrence of both orders.
